

Dear customer!

We are pleased to submit additional information to our article NOSTALGIE and its care.

First of all, we would like to draw your attention to our collection. NOSTALGIE does not require a lot of care. Normal cleaning can be done with a duster. NOSTALGIE should never be cleaned moist or wet as otherwise the wax layer may suffer. Direct sunlight should be avoided. Furthermore, furniture(s) upholstered with NOSTALGIE shall not be placed too close to heaters / radiators (minimum distance 50 cm). If you use heaters / radiators please take care that it is never blowing directly to the furniture. Hot beverages should not be placed onto the leather. In case that liquids drop to the leather, please just dab softly and do not rub.

The wax finish could not be treated with conventional care products.

There is a special wax paste for NOSTALGIE with which scratches or other small defects may be treated. This paste will be supplied colourwise compatible to the leather.

For further details we are always at your disposal.

We recommend:
